

QADEER ASLAM

DevOps / Cloud Engineer

Faisalabad, Pakistan | +92 302 4444809 | qadeeraslam888@gmail.com | linkedin.com/in/qadeer-aslam-devops | github.com/qadeeraay

SUMMARY

DevOps / Cloud Engineer with 2+ years of experience automating CI/CD pipelines and hardening AWS and Kubernetes environments. Proven track record building GitOps delivery platforms, self-healing automation, and observability stacks, and achieving PCI DSS and ISO 27001/27017/27018 compliance across production infrastructure.

SKILLS

Cloud & Containers: AWS (EC2, IAM, VPC, S3, CloudWatch, KMS), Docker, Kubernetes

IaC & CI/CD: Terraform, Ansible, Vagrant, GitOps (ArgoCD, Helm 3, Argo Rollouts), GitHub Actions

Observability & SRE: Prometheus, Grafana, Loki, Alertmanager, SRE Golden Signals, Incident Response

Security & Compliance: PCI DSS v4, SOC 2, ISO 27001/27017/27018, NIST 800-53/800-82, CIS Benchmarks, HashiCorp Vault, VAPT, Checkov, Trivy

Scripting & Systems: Python, Bash, Linux/Unix Administration, Networking (TCP/IP, DNS, VPN, Firewalls)

EXPERIENCE

DevOps / Cloud Engineer — HashX (Part-time)

Mar 2024 – Present

- Own end-to-end AWS infrastructure provisioning and CI/CD pipeline automation, sustaining high uptime and reliable release cadence for HashX's core platform, verified through continuous production monitoring.
- Lead production observability and rapid incident response, maintaining peak application availability through 24/7 incident and alert tracking.
- Direct DevOps strategy and architecture while serving concurrently as COO, aligning engineering execution with business priorities across a scaling product team.
- Evaluate and onboard third-party APIs and middleware, expanding platform capability with no added infrastructure overhead.

DevOps / Cloud Engineer — Al-Nafi (Part-time)

May 2025 – Aug 2026

- Automated configuration management with Ansible and Vagrant, eliminating manual server configuration drift and enabling fully repeatable environment provisioning.
- Hardened cloud infrastructure security controls across AWS (EC2, IAM, VPC, S3, CloudWatch), achieving PCI DSS and ISO 27001/27017/27018 compliance through enforced least-privilege RBAC and full encryption in transit and at rest.
- Conducted vulnerability assessments and penetration tests with engineering teams, reducing exposure to high-severity risks through prioritized remediation of critical CVEs.
- Built an enterprise observability stack with Prometheus, Grafana, and Loki, delivering real-time operational visibility through centralized metrics, logs, and alerting.
- Migrated applications to Docker and Kubernetes, enabling consistent, repeatable release cycles through containerization and orchestration of legacy workloads.
- Achieved alignment with ISO 27019:2017 and NIST 800-82 critical-infrastructure security standards by applying ICS/SCADA-specific controls for a critical-infrastructure client.

Flutter Developer Intern — Bird View Logic Pvt. Ltd.

Apr 2023 – Jul 2023

- Developed features in Flutter and Dart and participated in code reviews, delivering reliable cross-platform functionality through successful API integrations and consistent release-testing.

PROJECTS (GITHUB.COM/QADEERAAY)

Enterprise GitOps ArgoCD Pipeline — ArgoCD, Helm 3, Argo Rollouts, Kyverno

- Built a pull-based, zero-trust GitOps delivery platform with metric-driven canary analysis and Kyverno policy validation, triggering automated rollback in under 1.8 seconds on failure.

Kubernetes AIOps Self-Healing Operator — Python, Kubernetes API, Informers, Prometheus

- Built an autonomous Kubernetes operator using client informers and Prometheus metrics to auto-detect and remediate OOMKilled/CrashLoopBackOff failures, cutting MTTR by 99.2% (25–45 min to under 5 sec).

Secure AWS + K8s Compliance Engine — Terraform, AWS KMS/VPC/S3, Checkov, Trivy

- Wrote production-grade Terraform IaC enforcing 100% compliance across 213 automated policy controls (NIST 800-53, ISO 27001, PCI DSS), validated via CI security gates.

Production Observability Stack (Golden Signals) — Prometheus, Grafana, Loki, Alertmanager

- Implemented Google SRE's 4 Golden Signals with multi-window, multi-burn-rate alerting, detecting SLO-exhausting anomalies 14.4x faster.

Distributed API Gateway Rate Limiter — Python, Redis (Lua/EVALSHA), FastAPI

- Built a fail-open distributed rate limiter using atomic Redis Lua scripts (Token Bucket & Sliding Window Log), sustaining zero race-condition leaks under 10,000+ RPS with full RFC 6585 compliance.

EDUCATION

Bachelor of Science in Information Technology (BSIT) — The University of Faisalabad Oct 2021 – Jul 2025

CERTIFICATIONS

EduQual Level 5 Diploma in DevSysOps Engineering (UK-recognized) — Al Nafi

LFEL1004: Authentication & Authorization for Web Applications — The Linux Foundation
