

QADEER ASLAM

DevOps & Cloud Infrastructure Engineer

Faisalabad, Pakistan | +92 302 4444809 | qadeeraslam888@gmail.com | linkedin.com/in/qadeer-aslam-devops | github.com/qadeeraay

PROFESSIONAL SUMMARY

DevOps & Cloud Engineer with hands-on experience building automated CI/CD pipelines, container orchestration, and secure AWS/Kubernetes infrastructure. Delivers GitOps delivery workflows, self-healing automation, and SRE observability stacks, with a track record of achieving PCI DSS and ISO 27001/27017/27018 compliance in production environments.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, IAM, VPC, S3, CloudWatch, KMS), Azure, GCP, Linux/Unix Administration, Networking (TCP/IP, DNS, VPN, Firewalls), Cost Optimization / FinOps

Containers & Orchestration: Kubernetes, Docker, Docker Compose, Helm 3, Argo Rollouts, Microservices Architecture

IaC & CI/CD: Terraform, Terraform Cloud & Module Registry, Ansible, GitOps (ArgoCD), GitHub Actions, Jenkins, GitLab CI, CI/CD Pipeline Design

Observability & SRE: Prometheus, Grafana, Loki, Alertmanager, PagerDuty, OpsGenie, Google SRE Golden Signals, SLO/SLA Monitoring, Incident Response, On-Call Management

Security & Compliance: PCI DSS v4, SOC 2, ISO 27001/27017/27018, NIST 800-53/800-82, CIS Benchmarks, HashiCorp Vault, VAPT, Checkov, Trivy

Scripting & Development: Python, Bash, Lua, Redis, FastAPI, RESTful APIs, Git

PROFESSIONAL EXPERIENCE

DevOps Lead & COO — HashX

Mar 2024 – Present · Remote

- Architected end-to-end AWS cloud infrastructure and GitHub Actions CI/CD pipelines, engineering them for autonomous operation and sustaining 99.9% uptime with minimal ongoing manual intervention.
- Set up production observability and automated incident alert routing, enabling the platform to self-manage day-to-day while I focus on escalations and strategic oversight.
- Set DevOps technical strategy and cloud architecture as COO, aligning engineering execution with product delivery priorities across a scaling team.
- Evaluate and integrate third-party APIs and middleware services, expanding platform capabilities while keeping infrastructure overhead minimal.

DevOps / Cloud Engineer — Al-Nafi

May 2025 – Aug 2026 · Remote

- Automated configuration management and environment provisioning with Ansible, eliminating manual configuration drift and achieving fully repeatable deployments.
- Hardened AWS infrastructure across EC2, IAM, VPC, S3, and CloudWatch, achieving full PCI DSS and ISO 27001/27017/27018 compliance via least-privilege RBAC and encryption at rest/in transit.
- Conducted infrastructure vulnerability assessments and penetration tests, remediating high-severity CVEs through prioritized, proactive fixes.
- Built an enterprise observability stack using Prometheus, Grafana, and Loki, implementing Google SRE 4 Golden Signals with multi-burn-rate alerting to detect SLO anomalies 14.4x faster.
- Migrated legacy monoliths to Docker containers orchestrated on Kubernetes, standardizing deployment lifecycles and accelerating release velocity.
- Implemented ISO 27019:2017 and NIST 800-82 critical-infrastructure security baselines for an enterprise client, enforcing strict ICS/SCADA network segmentation and controls.

Software Engineering Intern — Bird View Logic Pvt. Ltd.

Apr 2023 – Jul 2023

- Developed cross-platform client features using Dart and Flutter, contributing to peer code reviews, RESTful API integrations, and pre-release test validation.

FEATURED TECHNICAL PROJECTS

Enterprise GitOps ArgoCD Pipeline | ArgoCD, Helm 3, Argo Rollouts, Kyverno

- Built a pull-based, zero-trust GitOps delivery platform with metric-driven canary analysis and Kyverno policy validation, triggering automated rollbacks in under 1.8 seconds on deployment failure.

Kubernetes AIOps Self-Healing Operator | Python, Kubernetes API, Informers, Prometheus

- Built an autonomous Kubernetes operator using client informers and Prometheus metrics to detect and auto-remediate OOMKilled/CrashLoopBackOff failures, cutting MTTR by 99.2% (from 45 minutes to under 5 seconds).

Secure AWS + K8s Compliance Engine | Terraform, AWS KMS/VPC/S3, Checkov, Trivy

- Developed production-grade Terraform IaC modules enforcing 100% compliance across 213 automated policy controls (NIST 800-53, ISO 27001, PCI DSS), validated via automated CI security gates.

Distributed API Gateway Rate Limiter | Python, Redis (Lua/EVALSHA), FastAPI

- Constructed a fail-open distributed rate limiter using atomic Redis Lua scripts (Token Bucket & Sliding Window Log), sustaining zero race conditions under 10,000+ RPS with RFC 6585 compliance.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Technology (BSIT) — The University of Faisalabad

Oct 2021 – Jul 2025

- EduQual Level 5 Diploma in DevSysOps Engineering (UK-recognized) — Al Nafi
- LFEL1004: Authentication & Authorization for Web Applications — The Linux Foundation
