

QADEER ASLAM

DevOps & Cloud Infrastructure Engineer

Faisalabad, Pakistan | +92 302 4444809 | qadeeraslam888@gmail.com | linkedin.com/in/qadeer-aslam-devops | github.com/qadeeraay

PROFESSIONAL SUMMARY

DevOps and Cloud Infrastructure Engineer with hands-on experience building automated CI/CD pipelines, container orchestration, and secure AWS/Kubernetes infrastructure. Delivers GitOps workflows, self-healing automation, and SRE observability stacks, achieving PCI DSS and ISO 27001/27017/27018 compliance in production environments.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, IAM, VPC, S3, CloudWatch, KMS), Azure, GCP, Linux/Unix Administration, Networking (TCP/IP, DNS, VPN, Firewalls), Cost Optimization / FinOps

Containers & Orchestration: Kubernetes, Docker, Docker Compose, Helm 3, Argo Rollouts, Microservices Architecture

IaC & CI/CD: Terraform, Terraform Cloud & Module Registry, Ansible, GitOps (ArgoCD), GitHub Actions, Jenkins, GitLab CI, CI/CD Pipeline Design

Observability & SRE: Prometheus, Grafana, Loki, Alertmanager, PagerDuty, OpsGenie, Google SRE Golden Signals, SLO/SLA Monitoring, Incident Response, On-Call Management

Security & Compliance: PCI DSS v4, SOC 2, ISO 27001/27017/27018, NIST 800-53/800-82, CIS Benchmarks, HashiCorp Vault, VAPT, Checkov, Trivy

Scripting & Development: Python, Bash, Lua, Redis, FastAPI, RESTful APIs, Git

PROFESSIONAL EXPERIENCE

DevOps Engineer — HashX

Mar 2024 – Present | Remote

- Achieved 99.9% platform uptime by architecting end-to-end AWS cloud infrastructure and GitHub Actions CI/CD pipelines engineered for autonomous, low-touch operation.
- Reduced day-to-day manual intervention by implementing production observability and automated incident alert routing, freeing focus for escalations and strategic oversight.
- Also serving as COO at this early-stage startup, aligning engineering execution with product delivery priorities by setting DevOps technical strategy and cloud architecture across a scaling team.
- Expanded platform capabilities while minimizing infrastructure overhead by evaluating and integrating third-party APIs and middleware services.

DevOps / Cloud Engineer — Al-Nafi

May 2025 – Aug 2026 | Remote

- Eliminated manual configuration drift and achieved fully repeatable deployments by automating configuration management and environment provisioning with Ansible.
- Achieved full PCI DSS and ISO 27001/27017/27018 compliance by hardening AWS infrastructure (EC2, IAM, VPC, S3, CloudWatch) through least-privilege RBAC and encryption at rest/in transit.
- Remediated high-severity CVEs through prioritized, proactive fixes by conducting infrastructure vulnerability assessments and penetration tests.
- Detected SLO anomalies 14.4x faster by building an enterprise observability stack (Prometheus, Grafana, Loki) implementing Google SRE 4 Golden Signals with multi-burn-rate alerting.
- Accelerated release velocity by migrating legacy monoliths to Docker containers orchestrated on Kubernetes, standardizing deployment lifecycles.
- Enforced strict ICS/SCADA network segmentation for an enterprise client by implementing ISO 27019:2017 and NIST 800-82 critical-infrastructure security baselines.

Software Engineering Intern — Bird View Logic Pvt. Ltd.

Apr 2023 – Jul 2023 | On-site

- Delivered cross-platform client features and validated pre-release builds by developing with Dart and Flutter, contributing to peer code reviews and RESTful API integrations.

FEATURED TECHNICAL PROJECTS

Enterprise GitOps ArgoCD Pipeline | ArgoCD, Helm 3, Argo Rollouts, Kyverno

- Triggered automated rollbacks in under 1.8 seconds on deployment failure by building a pull-based, zero-trust GitOps delivery platform with metric-driven canary analysis and Kyverno policy validation.

Kubernetes AIOps Self-Healing Operator | Python, Kubernetes API, Informers, Prometheus

- Cut MTTR by 99.2% (45 minutes to under 5 seconds) by building an autonomous Kubernetes operator using client informers and Prometheus metrics to detect and auto-remediate OOMKilled/CrashLoopBackOff failures.

Secure AWS + K8s Compliance Engine | Terraform, AWS KMS/VPC/S3, Checkov, Trivy

- Enforced 100% compliance across 213 automated policy controls (NIST 800-53, ISO 27001, PCI DSS) by developing production-grade Terraform IaC modules validated via automated CI security gates.

Distributed API Gateway Rate Limiter | Python, Redis (Lua/EVALSHA), FastAPI

- Sustained zero race conditions under 10,000+ RPS with RFC 6585 compliance by constructing a fail-open distributed rate limiter using atomic Redis Lua scripts (Token Bucket & Sliding Window Log).

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Technology (BSIT) — The University of Faisalabad

Oct 2021 – Jul 2025

- EduQual Level 5 Diploma in DevSysOps Engineering (UK-recognized) — Al Nafi
- LFEL1004: Authentication & Authorization for Web Applications — The Linux Foundation
